ABSTRACT

Nationwide experience over the last 20 years strongly suggests that state and local education agencies must work together to establish a common vision, standards, and common expectations -- a framework--for their comprehensive guidance and counseling programs. This document presents a framework that brings together the basic elements to develop, implement, and evaluate comprehensive quidance and counseling programs in local school districts. It provides a comprehensive approach to guidance and counseling that reaches one hundred percent of the student population in a school district. It is based on the premise that guidance is an integral part of the total educational system of a school and is integrated into all programs of the school district. The connection between student accountability and success and guidance/counseling programs is explored. An overview of standards for quidance and counseling programs is provided, and standards are discussed in regard to their benefits to school districts. Then the standards for program content, program structure, program delivery, and program evaluation are listed and explained. Finally, a program content definition and description are provided. Appendix I is "National Consortium Framework, Standards and Definition"; Appendix II is "A Matrix of Standards, Guidelines, Competencies, and Student Outcomes." (MKA)

Mission National Consortium of State

Guidance Leadership

The Consortium is a coalition of guidance representatives from participating state and territorial departments of education. The organization's mission is to enhance career guidance and counseling, leadership, and training; support research; and facilitate program improvements. The Consortium's purpose is to provide a framework for improving the effectiveness of elementary, secondary, and postsecondary programs, counselor education and supervision, and administration of comprehensive career guidance programs in school, community, and institutional settings. Specific objectives of the Consortium include the following:

- Provide opportunities that enable states to collaborate on and support projects of mutual priority, ongoing programs, career development, and pre-vocational services.
- Promote the development and improvement of career guidance at all levels of education and training.
- Involve business, industry, and government in creating, operating, and evaluating quality comprehensive career-guidance programs.
- Serve as a clearinghouse through which states can seek assistance from public and private sources for the improvement and expansion of career guidance programs.
- Offer technical assistance to states in developing their annual and longterm plans related to career guidance and counseling.
- Provide assistance in the development, implementation, and evaluation of comprehensive guidance programs.
- Provide evidence of program effects and a forum for promoting career guidance as a program of national significance with business, industry, and governmental entities.
- Influence career guidance professional literatures through research, publishing, and product development.

J

A National Framework for State Programs of Guidance and Counseling

A Foundation for Student Academic and Life Long Success

JUNE 2000

Foreword

Most individuals would agree that guidance and counseling programs, delivered developmentally, cause a number of positive effects for students academically and in the area of career development, and personal and social development. Likewise, counselors and others concur that good leadership causes good programs and their effects. Last, most would also agree good programs cause high impact effects, and thus, are strongly supported by policymakers at all levels. The problem currently facing the profession is how does a state or school develop and employ such leadership prior to having the desired results?

The National Consortium for State Guidance Leadership, operating for more than 17 years, is attempting to cause solutions to this guidance leadership issue. A white paper has been prepared and disseminated that traces the roots of guidance, provides a glimpse of what it takes to create effective programs, and gives examples of what leaders can and need to do. The Consortium provides this framework as another resource for implementing guidance and counseling as a program at the state and local levels. This framework is the structure for making guidance and counseling logically structured, complete, and accountable, which maximizes benefits for all students.

Preface

Nationwide experience over the last twenty years strongly suggests that state and local education agencies must work together to establish a common vision, standards, and common expectations—a framework—for their comprehensive guidance and counseling programs. The enactment of legislation and the establishment of state board policy consistent with state practices are key to this process. School boards, superintendents, principals, counselors, and teachers must understand the organizational structure of comprehensive guidance and counseling programs and their contributions to student achievement and life success. Such an understanding is essential if programs are to be articulated developmentally across all grade levels. Maintaining the continuity of guidance and counseling programs, and guaranteeing their sustainability over time, are dependent on all individuals in the system being familiar with and supportive of the programs.

To meet this need, A National Framework for State Programs of Guidance and Counseling was developed. This framework brings together the basic elements to develop, implement, and evaluate comprehensive guidance and counseling programs in local school districts. It provides a comprehensive approach to guidance and counseling that reaches 100% of the student population in a school district. It is based on the premise that guidance is an integral part of the total educational system of a school and is integrated into all programs of a school district.

Although many comprehensive guidance and counseling programs are in place throughout the United States, many schools are still not at this point and need assistance. Change is needed for the full implementation of these programs and to ensure that guidance remains at the forefront of school reform. All educational leadership needs to understand the impact guidance and counseling has in their schools and how these programs need to change to meet the needs of all students. Within the education community, school counselors have been, and are at the forefront of responding to these changes through their work in developing and managing comprehensive guidance and counseling programs in their schools.

There are several resources currently available which states or districts use to develop their comprehensive guidance and counseling programs. The National Career Development Guidelines, sponsored by the National Occupational Information Coordinating Committee (NOICC); the National Standards for School Counseling Programs, sponsored by the American School Counselors Association (ASCA); Standards for Counselors, sponsored by the National Career Development Association (NCDA); and numerous state department or professional association models have provided the basis for states and districts to develop their own programs. This framework was developed to include all

the elements represented in key state models that have been successful in building and implementing comprehensive programs. The framework is based on current developmental theory and research as well as the general concerns and needs of guidance leaders. To further assist with implementation, a user guidebook is available which provides resources and strategies for implementation.

The Framework for Comprehensive Guidance and Counseling Programs is divided into three sections. The first section places guidance and counseling programs as a strong solution to student achievement and educational reform. The second section presents seventeen (17) suggested program standards and their performance indicators. Program standards are defined as quality criteria used to make judgments about a program. They are used by evaluators to conduct an audit of a guidance and counseling program to verify that it is in place and functioning as it should. Performance indicators further define the standard and provide an accountability measure. The standards are based on the essential components of a comprehensive program that make up the structure, a delivery system of guidance activities and services to students, parents, teachers, administrators, and the services, and the required resources in the community. The third section defines the content for comprehensive guidance and counseling programs defined in terms of student competencies. Samples of competencies developed by various organizations and states are included in the appendices.

> Harry N. Drier Executive Director

Guidance and Counseling Programs' Connection to School and Student Accountability and Success

The connection between comprehensive school guidance and counseling programs and school academic accountability begins with the establishment of academic standards for students. Academic standards articulate a common core of knowledge and skills that every student should possess. They define what each student should know and do in a core set of subjects. They provide a solid foundation for future learning and give students, teachers, and parents consistent targets to meet.

Standards form the heart of school improvement. There are two kinds of academic standards:

- Content standards that define what students should know and be able to do; and
- Performance standards that describe (a) what kind of work students have to do to meet the content standards; and (b) how well they do it.

Standards are only meaningful if one can answer the question "How good is good enough?"

In addition to the rationale for standards described above, academic standards set high expectations that drive curriculum and, when fully aligned with the assessment and accountability system, give schools the information they need to re-evaluate and strengthen their programs.

In 1998, the UCLA Center for Mental Health in Schools published a report to encourage school boards to increase their focus on addressing barriers to learning in our nation's schools.

Most districts handle barriers to student learning in a piecemeal and fragmented manner and do not focus on what the UCLA Center termed the Enabling Components as an important partner with the Instruction and Management components of the school environment.

We are now coming to the realization that we must define what a good, meaningful education is—and that definition is standards. Then we can use the resources we have to reach those standards. That makes good sense, and it's a practical approach. Without knowing where you are going, you certainly cannot get there.

Richard Riley, U.S. Secretary of Education

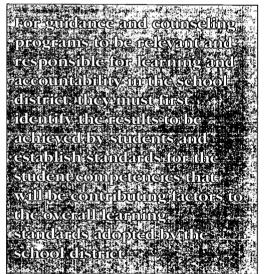

Harold Hodghinson, director of the Center for Demographic Policy, estimates that 40% of young people are in very bad educational shape and at risk for failing to fulfill their promise. The percentage is higher in urban areas. Until the barriers hindering the performance and learning of these students is assimilated into the overall efforts of the schools and school districts little change will take place.

The UCLA report states that while emphasis on higher expectations, assessment, waivers, accountability, and no excuses is important, such demands are not enough to turn around schools where large numbers of students are performing poorly. In such settings, there is also a need for comprehensive, multifaceted approaches for addressing barriers to learning and teaching.

Comprehensive guidance and counseling programs must become a contributing part of this enabling component in the schools. In collaboration with school, school district and community agencies they must be part of the solution for ameliorating behavioral, emotional, and learning problems for all students.

For guidance and counseling programs to be relevant and responsible for learning and accountability in the school district, they must first identify the results to be achieved by students and establish standards for the student competencies that will be contributing factors to the overall learning standards adopted by the school district.

A comprehensive guidance and counseling program sets student standards for competencies to be achieved, contains a body of content and uses varying strategies to deliver this content to all students. The guidance and counseling program is evaluated and held accountable for its results, as well as for whether certain functions or activities are in place. Also, in collaboration with other programs, the guidance and counseling program is accountable for district goals and missions that ensure student learning. Along with these other programs it must be seen not only as an accountability system, but also as a circle of support for students and learning.

The goal or outcome of all guidance and counseling programs is learning. All program content—all intervention strategies—must focus on learning. In this respect, a guidance and counseling program is similar to all other school programs. The relevance of the guidance and counseling program to the school district goals and mission lies in its primary goal—learning. Guidance and counseling programs must address whatever interferes with a child's ability to learn, to succeed, and to participate in the learning process. Although the content of guidance and counseling programs addresses such results as social and personal adjustment, educational and career planning, human growth and development, self-esteem, parenting skills, and emotional

health, it is how these results enhance learning that justifies the existence of the program. Academic excellence requires personal excellence and the ability of an individual to utilize the educational opportunities available. The content of the guidance and counseling program and the varying strategies used to implement that content are the means to this end.

The content of guidance and counseling programs addresses student needs. These needs are expressed as the gap, or the difference, between the expected progress and the actual progress in the student's personal, social, academic, and career development. Competency in these developmental areas facilitates learning and achievement. For growth and development, it is critical for students to acquire at an early age, a solid based of motivation, aspirations, positive attitudes, self-acceptance, and knowledge of alternatives. And it is critical for students to continue to build on these throughout life.

Competencies such as study skills, test-taking skills, resource utilization, problem-solving skills, interpersonal and social skills, educational and career-planning skills, self-esteem, self-knowledge, occupational knowledge, employability skills, decision-making skills, conflict resolution, listening skills, and knowledge of learning styles form a core content of guidance and counseling programs.

Such competencies serve as intermediate outcomes in their own right. Yet they, in turn, also allow students to more fully and effectively participate in and use the learning opportunities available in school and in the community. They, in essence, facilitate the long-term outcome of all programs—learning, achievement, and attainment of the school district's goals and mission.

The content and strategies of the guidance and counseling program will vary with student needs, but its primary goal-student learning—never changes.

The content and strategies of the guidance and counseling program will vary with student needs, but its primary goal–student learning–never changes. The program content however, should not be viewed as a prescription of the counselor's role, but rather as a description of a plan to collaborate with other school programs in enhancing student achievement. The programs must identify ways that counselors can share responsibility for and establish an ownership of the district goals and mission.

First and foremost, the comprehensive guidance and counseling program and school counselors must reaffirm their commitment to and involvement with learning. Although counselors are not directly responsible for what teachers teach, they contribute to, with other staff and parents, how students learn—and consequently, for what students learn. The program, in collaboration with teachers, parents, and the community must become an integral part of managing learning, recognizing that the primary cause of learning is the student, not the staff.

4.3

It is this focus on student standards, the collaboration with other programs and the exercise of leadership and management skills that can provide the greatest contribution to achieving the school district's goals and missions. Assuming more accountability, meeting students' learning needs, learning continually, and transforming programs and the community to be receptive to learning—all have a place in comprehensive guidance and counseling programs.

All programs seek success, achievement and learning for all students. Every guidance and counseling program can seek and plan for nothing less.

Standards for Guidance and Counseling Programs

The program standards are rooted in the assumption that thoughtful design and implementation of guidance and counseling programs at the local level is necessary to provide comprehensive and coordinated experiences for all students across all grade levels. These standards are criteria for the quality of and conditions for comprehensive guidance and counseling programs. They focus on issues at the school and district levels that relate to the design and delivery of the program. Each district must translate these standards into a format and system that is consistent with their local policy and practices.

Benefits to School Districts

Program standards for guidance and counseling benefit school districts by assisting them in:

1. providing a framework for guidance and counseling program management.

This framework outlines a state's vision and expectations for a quality program. Indicators for each standard are described in a nonprescriptive way so that each school district has the flexibility and responsibility to define for itself what constitutes a quality program.

2. implementing the guidance and counseling program.

The framework also provides standards for delivery or implementation of the program. These guidelines provide the structure for delivering services to all K-12 students through a variety of activities and settings.

3. building partnerships.

A standards based system will assist with building relationships between educators, parents, business/industry, and community organizations and agencies. These partnerships will promote greater communication among all those concerned with the growth, development, and well-being of students.

4. demonstrating performance.

A standards based program will help educators demonstrate to parents and the community the value and impact of guidance and counseling programs. Counselors will be able to show that their work contributes to student achievement and success.

Program Standards Overview

The first standard that follows describes the content of the guidance program. This standard is followed by nine standards representing needed structural elements for a guidance and counseling program. Then four standards are described that highlight guidance and counseling program delivery components. This is followed by three standards that present program evaluation. In all there are seventeen standards included in *A National Framework for State Programs of Guidance and Counseling*.

Program Content Standard

The comprehensive guidance and counseling program is based upon specific student growth and development content.

Program Content

The content of a comprehensive guidance and counseling program is based on student competencies and is organized by domains such as academic achievement, personal-social development, and career development. The competencies within each domain are organized by grade levels or grade level groupings. Priorities for addressing the competencies are set by the guidance team and are based on student needs assessment. A variety of strategies, activities, delivery methods, and resources are used to promote student mastery of these competencies to ensure student success.

Indicators:

- ▶ The program content is organized by specific domains of learning.
- ▶ The program content is structured and articulated by grade level through a developmental scope and sequence.
- ▶ The content is delivered in stand alone and/or infused units in various subject matter areas.
- ▶ Student performance is based upon demonstrated competency attainment.

Program Structure Standards

A mission statement for the district's guidance and counseling program has been developed.

Standard Two: Mission Statement

Mission Statement

The program mission is a clear statement of the purpose of the guidance and counseling program and how it relates to the overall mission of the school district. It identifies the centrality of guidance and counseling in education as an integral program. It describes student outcomes as a result of participation in the program. Also it describes a program that is developmental, as well as remedial in design, and includes sequentially organized activities and procedures. This program is implemented by professional school counselors working closely and collaboratively with parents, teachers, students, administrators, and employers.

Indicators:

- ▶ The statement describes the guidance and counseling program as integral to the total educational system.
- ▶ The statement describes the program as developmental as well as remedial.
- ▶ The statement is supportive of the district's mission.

A rationale/philosophy for the district's guidance and counseling program has been developed.

Standard Three Rationale/Philosophy

Rationale/Philosophy

The rationale/philosophy describes the importance of guidance and counseling as an equal and responsible partner in fostering student academic, career, and personal/social development. It also provides reasons why students need the guidance competencies they will master as a result of their involvement in a comprehensive guidance and counseling program. In addition, it provides a foundation/belief system for the program.

Indicators:

▶ The statement establishes the need for the district's program.

- ▶ The statement connects the program to the educational goals of the district.
- ▶ The statement provides the rationale for structuring guidance and counseling as a program delivered to all students in contrast to an array of ancillary services available to students.

Standard Pour Assumptions:

Assumptions concerning the nature and structure of the district's guidance and counseling program and the work of program staff have been identified.

Assumptions

Assumptions are the principles that shape and guide the program. They include statements regarding the essence of the contribution the program makes to student success and the competencies professional school counselors must have to carry out their responsibilities. Assumptions identify and briefly describe the premises on which a guidance and counseling program rests. They give the program its shape and direction, its nature and structure.

Indicators:

- Assumptions state the premises on which the program rests.
- Assumptions identify the principles under which the program staff work.

Standard Prives Advisory Committee

An advisory committee for the guidance and counseling program has been established and is active.

Advisory Committee

The advisory committee acts as a liaison between the school and community. It is recommended that the advisory committee be comprised of school staff, parents, Board of Education members, and business and community leaders. A primary duty of the committee is to advise those involved in the program concerning the establishment of program goals, to review present activities, and to encourage improvement and implementation of new activities. Representation and involvement of the advisory committee will vary according to program needs and issues. Committee members can be particularly helpful in developing and implementing the public relations plan for the program.

Indicators:

- ▶ The committee functions with a written plan of operation.
- ▶ The committee provides guidance and counseling in program design.
- ▶ The committee has appropriate representation of the following: gender, business/industry, parents/guardians, students, minorities, teachers, school administrators, and community organizations and agencies.

Adequate financial resources are provided for the guidance and counseling program to fully ensure implementation.

Standard Six: Financial Resources

Financial Resources

Adequate financial resources are crucial to the success of a comprehensive guidance and counseling program. The local program budget should provide for all resources needed to carry out the program. It could include funds from the district, community, and other external sources.

Indicators:

- ▶ Financial resources for the program are provided.
- ▶ Funds are identified from internal and external sources.
- ▶ Program staff annually develop a budget to ensure full program implementation.

Standard Seven: Facilities/Resources/Equipment

Guidance and counseling program facilities, resources, and equipment appropriate to carrying out the full intent of the district's program are provided.

Facilities/Resources/Equipment

It is recommended that space be established for guidance and counseling facilities in each school. This space should be large enough to adequately house personnel, resources, and equipment. This area must be accessible to all students. Minimum requirements for this space are: a properly equipped, private office for each counselor; a well organized and displayed collection of guidance materials; technological resources available for use by program staff

and students; space for individual, small, and large group use; and adequate and secure storage space.

Indicators:

- ▶ Appropriate space is provided in each building to meet program needs.
- ▶ The guidance facility includes the equipment necessary for word processing, data management, internet access, and information/data transmission necessary for program operation.
- ▶ Facilities and equipment required for student, parent, and staff use of education and career information is available including print media, a computer assisted delivery system, and internet resources.

Standard Eight: Professional Staff

Properly credentialed staff for the guidance and counseling program is in place.

Professional Staff

Professional school counselors are the providers and managers of guidance and counseling programs. Job descriptions for each position should be in place and utilized by the administration. In addition, the involvement, cooperation, and support of teachers, administrators, parents, students, as well as representatives from community organizations, and business/industry are necessary for a successful program. Both district and building level leadership is crucial as well, as is the maintenance of appropriate student/counselor ratios.

Indicators

- ▶ The district's guidance and counseling program is directed by a fully credentialed school counselor.
- All school counselors are certified by the state.
- ▶ Job descriptions for school counselors are derived directly from the school district's guidance and counseling program.
- ▶ The ratio of students to school counselors meets state or professional association standards.
- ▶ The program requires that school counselors virtually eliminate all non-guidance and quasi-administrative duties.

- ▶ The program requires that a targeted amount of counselor time (usually 70-80%) to be devoted to direct services to students.
- ▶ The program has established target time allocations to individual planning, the guidance curriculum, responsive services, and system support.

The written district-wide guidance and counseling

Standard Nine: Political and Legal Resources

program and a policy statement for guidance have been adopted by the Board of Education.

Political and Legal Resources

The political resources of a comprehensive guidance and counseling program include district policy statements, pertinent state and federal laws, state and local Board of Education rules and regulations, and professional association position statements and standards. A clear and concise Board of Education policy for guidance is mandatory for the successful operation of the program in the school district. A policy represents a statement of support and provides a course of action, or a set of guiding principles designed to influence and determine decisions concerning the program.

Indicators:

- ▶ The program has been adopted as an official program of the school district.
- A policy statement for guidance has been developed and is included in the district's policy book.
- ▶ The policy statement reflects the nature, content, and structure of the program.

Standard: Tens: Student Assessment

The guidance and counseling program provides for academic, career, and personal-social assessments.

Student Assessment

A comprehensive guidance and counseling program is based upon theories of human growth and development and the particular needs and special characteristics of students. Data and information obtained from a variety of assessments assist students and their parents to identify students' interests, strengths, and abilities. This information is used with students individually and collectively in life career planning and academic improvement. An effective student assessment process will enable the professional guidance staff to identify trends and issues within the local school which will, in turn, have implications for program direction/redirection and will assure that the needs of all students are being met.

Indicators:

- ▶ Student assessment data are used for like career planning by counselors, teachers, and parents.
- ▶ Interest and aptitude assessments are used at appropriate grade levels.
- ▶ Professional personnel review implications and issues embodied in assessment data.
- ▶ Student assessment data is used for student academic improvement and to improve curriculum and instruction.

Standard Eleven: Curriculum

A guidance and counseling program curriculum that specifies what competencies all students should master has been developed and is being implemented.

Curriculum

The curriculum provides the content, scope and sequence, and instruction of the guidance and counseling program to all students. It typically consists of competencies for students (organized by domains or areas and specified by grade levels) with structured strategies, activities, or units presented systematically through classrooms, large groups, or school-wide events. The purpose of

the guidance curriculum is to provide students with knowledge of normal growth and development, assist them in acquiring and using life skills, and assist them in making future education and career plans to achieve district standards.

The guidance and counseling curriculum is not limited to being taught in one or two subjects, but is included in as many subjects as possible. School counselors teach, team with teachers, or support teachers in delivering program curriculum through activities or units. The support of the entire faculty is necessary for its successful implementation. Also critical is that parents be invited to review, provide input and be encouraged to reinforce learnings from the curriculum at home. Employers and community representatives should play a role in this process by collaborating with counselors and teachers in curriculum delivery.

Indicators:

- ▶ The curriculum was developed based on current student needs.
- Activities are delivered to all students through classrooms, large and small groups, and school and community events.
- ▶ School counselors, teachers, parents, and employers work collaboratively when appropriate in delivering the program curriculum.
- Guidance and counseling curriculum activities support student individual planning emphasizing the development and use of career decisionmaking, goal-setting, and planning skills.
- ▶ Curriculum articulation exists between grade levels and school buildings.

Standard: Twelve: Individual Planning

All students, along with their parents/guardians, are provided opportunities to develop, monitor, and manage their educational and career plans.

Individual Planning

The purpose of individual planning is to assist students to plan for, monitor, and manage their personal-social, educational, and career development. The focus of these activities is on students developing life career plans including their skills, aptitudes, and abilities. School counselors and others with guidance and counseling responsibilities serve students and parents as facilitators of students' development.

The foundation for life career plans is established during the elementary school years. Self-concept development, the acquisition of learning skills, interpersonal relationship skills development, decision-making, skill building, and awareness and beginning exploration of educational and career possibilities are examples of topics that are learned. These same topics are reinforced through guidance and counseling curriculum activities during middle and high school. New information and experiences enables students to develop and manage their life career plans.

During the middle school years, students' plans focus on high school course selection, taking into account graduation and postsecondary requirements. Guidance curriculum activities continue to support and guide the planning process.

During the high school years, plans developed in middle school are reviewed and updated annually in accordance with students' personal, educational, and career goals. Individual planning provides time for work with students and their parents/guardians. Guidance curriculum activities continue to support student planning by giving emphasis to the development and use of career decision-making, goal-setting, and planning skills. The importance and relevance of basic academic and occupational preparation skills are stressed.

Indicators:

- ▶ Individual planning with the necessary forms and procedures is in place for all students and their parents/guardians.
- ▶ Individual planning includes assessment, advisement, and placement activities to meet students' developmental needs.

- Activities are provided through individual and group sessions designed to assist in making education and employment transitions.
- Individual plans are reviewed and updated annually.

All students and their parents/guardians have access to responsive services, including

Standard Thirteens Responsive Service

consultation individual and small group counseling, and referral to assist them with problems or concerns related to their personal, social, and career development.

Responsive Services

A comprehensive guidance and counseling program includes responsive services such as counseling, consultation, and referral that are available to all students and their parents. These services are designed to assist students with concerns or problems related to academic, career, and personal/social development. Although counselors have special training and possess skills to respond to immediate needs and concerns, the cooperation and support of the professional staff is necessary for these services to be successful. Parental involvement with and participation in these activities is critical. This may include referring their children for assistance, working with school counselors and other school staff to identify issues of concern, giving permission for needed special services, and providing help in resolving issues. Responsive services may include consultation with parents, teachers, other professional staff, personnel in community agencies and business/industry; individual and small group counseling to assist students with identifying problems and their causes, alternatives and possible consequences, and to take appropriate action; and referral to professional resources in the school and community.

Indicators

- ▶ Individual and small group counseling is available to all students.
- ▶ Consultation occurs with teachers, administrators, and parents/guardians regarding individual students' academic progress, personal-social, and career concerns and issues.
- ▶ Referral to school (school counselors, school psychologists, social workers, etc.) and community professionals is provided.

Program Delivery Standards

Standard Pources Managenencand Support

Management and support strategies are in place for maintaining and enhancing the district's comprehensive guidance and counseling program.

Management and Support

A comprehensive guidance and counseling program requires an ongoing support system to maintain and enhance the total program. This component includes strategies that support the goals of the school system as well as the guidance program in the following areas:

Indicators:

- ▶ Research and development is provided so that development and updating of guidance learning activities, data analysis, and follow-up studies are conducted.
- ▶ The program has sufficient political and legal resources that adheres to policies, procedures, association standards, pertinent state and federal laws, state and local Board of Education rules and regulations, and professional association standards in the development and implementation of its guidance and counseling program.
- Counselors and other guidance staff are continuously updating their knowledge and skills in accordance with their professional development plan.
- The guidance program involves the implementation of a marketing/public relations plan for the program. Newsletters, working with local media, and school and community presentations are examples of activities.
- ▶ Counselors need to serve on departmental curriculum committees and community committees or advisory boards is an important component in forming networks and building program support.
- Community outreach activities are included designed to help professional guidance staff become knowledgeable about community resources, employment opportunities, and the local labor market. This may include visiting local businesses/industries and social service agencies on a periodic basis.

- b Guidance program management includes the planning and manage-ment tasks needed to implement and support program activities such as preparing budgets, facilities design, and staffing.
- Description Counselors participate in a fair-share way with the routine "running of the school." This means all members of the school staff take equal turns doing to assure the smooth operation of the school.

Program Evaluation Standards

The evaluation of guidance and counseling program focuses on three areas: personnel, program, and results. Are the school counselors and other personnel with guidance responsibilities being supervised and evaluated based on job descriptions derived directly from the district's guidance and counseling program? Is there a written guidance and counseling program and is the written guidance and counseling program the implemented program? Are the results of the program being assessed and is this data used to enhance the district's program?

Standard Eifteen: Personnel Evaluation

The district utilizes a personnel performance based supervision evaluation system for

school counselors and other professional guidance and counseling program staff.

Personnel Evaluation

The purpose of evaluating school counselors' performance, as well as other guidance personnel is to improve program delivery and impact. It also provides for communication among school counselors, guidance program staff leaders, and school administrators concerning roles and responsibilities. The guidance program is the key element in designing evaluation tools and expectations for counselor performance. Job descriptions provide the basis for individual performance based evaluation by the administration.

Indicators

- ▶ School counselors' job descriptions are derived directly from the tasks required to operate the district's guidance and counseling program.
- ▶ School counselors are supervised and evaluated on the basis of their job descriptions.

The district-wide guidance and counseling program is assessed periodically using program standards.

Standard Sixteen: Program Evaluation

Program Evaluation

Program evaluation asks two questions: Does the school district have a written comprehensive guidance and counseling program? Is the program being fully implemented? Answers to these questions are provided through a process called program evaluation, the goal of which is to examine the written program carefully and to verify through documentation that it is the implemented program. Whether or not a written guidance program exists in the district and whether or not any discrepancies exist become clear as the evaluation process unfolds. Standards and indicators are used to conduct program evaluation.

Indicators:

- ▶ The program has established and utilizes a formal program review process.
- ▶ The review process is based on program standards and indicators.

The district has established and utilizes a results evaluation plan for the guidance and counseling program.

Standard Seventieen, Results Evaluation

Results Evaluation

Results evaluation focuses on the program goals and their impact on students. Program results may be obtained through student assessment, data collection, and follow-up studies, as well as interviews with students, parents, school personnel, and the community.

Indicators:

- ▶ Procedures, forms, and instruments are utilized to assess the results of the district's guidance and counseling program.
- Results evaluation data are used as a part of the program review/improvement process.

Program Content Desimition and Description

A comprehensive guidance and counseling program is built and delivered around a body of knowledge (content) anchored in human growth and development theory. It's this content that provides the basic focus for delivery and student performance standards or competencies. It's then at this point, that program staff can be specific about the instructional scope and sequence of learning and realize what performance (knowledge, aptitudes, or skills) should be expected at various points in time.

While there are a variety of models for defining and sequencing the guidance program content, the following is one that reflects best practices in the states.

A first level of content definition that encompasses all that a guidance program represents is a clustering of key content. The following is one recommended structure.

I. Knowledge of Self and Others

This then could be organized more specifically through a further content breakdown as follows:

- understanding uniqueness
- ▶ understanding benefit of interpersonal harmony
- ▶ accepting self
- ▶ decision-making
- ▶ getting along with others
- ▶ understanding the effects of substance abuse
- ▶ positive family relationships

II. Career Planning and Exploration

- expanding career options
- b understanding issues related to sex equity and career options
- ▶ understanding how to use leisure time

III. Educational and Career Development

- ▶ understanding how good study habits/skill will improve performance
- ▶ understanding skills related to problem-solving
- understanding education requirements
- ▶ understanding requirements related to various career choices and opportunities

A second level of program content definition is to take the above clusters and developmentally sequence them across grade levels, the degree in which student competency (performance) is expected. Then developmentally scope and sequence student performance standards that are used to develop, update, or change the guidance program, activities to be delivered by guidance professionals, teachers, and others involved in the program. Additionally, content and learning expectations then can be incrementally measured to determine student performance.

These content clusters and related competencies are further organized around concepts demonstrated by the following examples.

- self concept
- decision-making
- stress and conflict management
- o college choice
- employability skills
- work skills
- personal health and safety
- creative thinking
- time management
- substance abuse awareness
- acquisition of resources
- use of planning information
- career awareness
- communication skills

- jobseeking/retention skills
- test taking skills
- o confidence and respect
- world of work
- personal finance management
- understanding interest and abilities
- educational transition
- career pathway choice
- life style aspirations and conditions
- job/career requirements
- goal setting
- self expression
- physical and learning strengths and barriers

It is at this level of program content definition that specific direction for what students should experience, when and at what level of performance expectation the program has to be used in conducting its results evaluation.

Appendix I: National Consortium Framework Standards and Definitions

Standard One: Program Content

The comprehensive guidance and counseling program is based upon specific student growth and development content.

Standard Two: Mission Statement

A mission statement for the district's guidance and counseling program has been developed.

Standard Three: Rationale/Philosophy

A rationale/philosophy for the district's guidance and counseling program has been developed.

Standard Four: Assumptions

Assumptions concerning the nature and structure of the district's guidance and counseling program and the work of program staff have been identified.

Standard Five: Advisory Committee

An advisory committee for the guidance and counseling . program has been established and is active.

Standard Six: Financial Resources

Adequate financial resources are provided for the guidance and counseling program to ensure implementation.

Standard Seven: Facilities/Resources/

Equipment Guidance and counseling program facilities, resources, and equipment appropriate to carrying out the full intent of the district's program are provided.

Standard Eight: Professional Staff

Properly credentialed staff for the guidance and counseling program is in place.

Standard Nine: Political and Legal Resources

The written district-wide guidance and counseling program and a policy statement for guidance have been adopted by the Board of Education.

Standard Ten: Student Assessment

The guidance and counseling program provides for academic, career, and personal-social assessments.

Standard Eleven: Curriculum

A guidance and counseling program curriculum that specifies what competencies all students should master has been developed and implemented.

Standard Twelve: Individual Planning

All students, along with their parents/guardians, are provided opportunities to develop, monitor, and manage their educational and career plans.

Standard Thirteen: Responsive Services

All students and their parents/guardians have access to responsive services, including consultation and referral to assist them with problems or concerns related to personal, social, and career development.

Standard Fourteen: Management and

Support Management and support strategies are in place for maintaining and enhancing the district's comprehensive guidance and counseling program.

Standard Fifteen: Personnel Evaluation

The district utilizes and personnel performance based evaluation system for professional program staff.

Standard Sixteen: Program Evaluation

The district-wide guidance and counseling program is assessed periodically using program standards.

Standard Seventeen: Results Evaluation

The district has established and utilizes a results evaluation plan for the guidance and counseling program.

Appendix III: Organizing the Content for Comprehensive Guidance Programs

A Comparison of the National Occupational Information Coordinating Committee (NOICC) Guidelines, Missouri Comprehensive Guidance Model-Areas, Categories and Competencies and American School Counselor Association (ASCA) Standards

What are the similarities and the differences in the three way of organizing the content for comprehensive guidance? This is the question that is often asked and many times the answer leads to confusion among various audiences. This has been especially true when school counselors and other professional educators review various guidance program materials that have been developed in states and local school districts across the nation.

The crosswalk that follows will serve to illustrate that while there are many different approaches in defining the content for a comprehensive guidance and counseling program, there are also commonalties within the various programs. For purposes of this crosswalk, the primary focus will be on a comparison of the National Career Development Guidelines (NOICC), the Missouri Comprehensive Guidance Program and the National Standards for School Counseling Programs (ASCA). This will then show comparisons between the work of a Federal Agency/Organization, a State Department of Education and a National Professional Association

The three illustrations used in the following crosswalk are basically designed around three major content areas. While the terminology is somewhat different, the focus is primarily the same. Figure 1 that follows will illustrate the basic content areas around which each of the three examples have been organized and developed:

Figure 1. Major Organizational Areas

NOICC	MISSOURI	ASCA
Self Knowledge	Knowledge of Self and	Personal/Social
	Others	Development
Career Planning	Career Planning and	Career Development
_	Exploration	
Educational and	Educational and Vocational	Academic Development
Occupational Exploration	Development	

Following each of the major organizational areas, there are competencies, standards or categories that further organize the three listings or illustrations. NOICC uses "Competencies" as the next step in organizational structure, Missouri uses "Categories" and ASCA uses "Standards. This is further illustrated in figure 2-Second Level Organization.

Figure 2. Second Level Organizational Categories

NOICC	MISSOURI	ASCA
Competencies	Categories	Standards

Following the second level of organization, each of the three programs then moves to a third level of organizational structure. It is in the third level of the organization framework that each of the listings/illustrations defines the expected student outcomes or competencies to be attained as youth move through the various stages of educational/career development. Readers reviewing information contained in this crosswalk should be aware of the differing use of terminology within each of the three examples. This is especially true when one considers the language found in the second and third level organizations.

Figure 3. Third Level Organizational Categories

NOICC	MISSOURI	ASCA
Indicators	Competencies	Competencies

Generally speaking then, each of the ways of organizing the content for guidance, NOICC, Missouri and ASCA, have three levels of organization as referred to in Figures 1-2-3 above.

All comprehensive guidance and counseling programs, at both the state and local level, should contain a description of what is expected of students as a result of effective comprehensive guidance program development, implementation and evaluation. The identification of expected student outcomes/competencies then must be the focal point around which comprehensive guidance and counseling program activities are implemented.

The following crosswalk will illustrate what student outcomes/competencies are expected within each of the three illustrations. The primary purpose of this section is to show that there are many similarities in the various listings/illustrations that have been developed. While terminology and use of language is different, the end results are basically the same—what will students achieve as a result of their participation in an effective comprehensive guidance and counseling program? Regardless of the use of language and various types of terminology, the end result of any guidance program must be measured by the impact that it is having on the lives of students across the nation.

A COMPARISION OF THREE MAJOR PROGRAM EFFORTS

(The following comparisons are provided as examples only and are not intended to relect the entire content of three programs used for illustration. A complete illustration of the three programs can be found in the companion "users guide" for this document.)

Acknowledgements

The National Consortium for State Guidance Leadership is indebted to many professionals who have provided their vision, time, and support to this National Framework for improving guidance and counseling programs at the state and local levels. The agencies and state department and university representatives listed below served as the development committee in preparation of the document. Through their advice and leadership, this document will serve as a framework for state guidance leadership in implementing improvements in existing guidance programs across the country. A special thank you is extended to the National Occupational Information Coordinating Committee (NOICC) who have provided valuable support in the preparation and evolution of this document. A special thanks is also due to Dr. Norm Gysbers whose insights and valuable comments helped guide us in our work. Through his extensive work across the country he was able to put the Framework into a future and realistic context.

Most importantly, however, thanks are due in great measure to the many members of state guidance leadership with whom we have spoken and corresponded with throughout the year. Without their willingness to share their state's policies and practices, this document could not have been prepared.

This project was guided by an advisory committee which provided the Consortium with futuristic and substantial framework content.
